

- **Journal of Horticultural Research** (J. Hort. Res.) is a peer-reviewed journal, which publishes original papers, short communications and review articles covering basic sciences as well as practical aspects of fruit, vegetable and ornamental plant research. Journal of Horticultural Research is a continuation of the two journals published hitherto by the Research Institute of Horticulture: Journal of Fruit and Ornamental Plant Research and Vegetable Crops Research Bulletin.
- The main focus of the Journal is on temperate zone horticulture.
- The areas covered by the Journal include: biotechnology, crop cultivation outdoor and under covers, economics and management Research, glasshouse climate, growth regulators, nutritional value, pests and diseases, plant breeding, plant-water relations, post-harvest physiology and quality evaluation, seed science, soil biology, soil management and plant nutrition, storage and processing technology, weed science.
- The manuscript submitted should not have been published previously, either in parts or as a whole, and not being considered for publication elsewhere.
- The main criteria applied for manuscripts' acceptance for publication are originality, scientific value, data of repeated experiments and relevance for the areas as above. Manuscripts based on the results of the 1-year/1-growing season field trials and other experiments without repetitions will be rejected without review.
- Parallel to the print, the papers accepted for publication will be published on-line on free access basis.
- The publication is free of charge.
- Manuscript submission: www.editorialsystem.com/jhr/
- The manuscripts should be written in English.
- The manuscripts should be typed with double-space on A4 page with 2.5 cm margin all around.
- The **full paper** should not exceed 15 pages, including references, tables, figures and photographs.
- The **Short communication** should not exceed 7 printed pages and one illustration.
- The **Review paper** should not exceed 20 pages.
- **TITLE PAGE** should contain the full title of the paper, key words (4 to 6), abbreviations (if necessary) and running title (up to five words).
- **ABSTRACT** should be 150–250 words and without abbreviations used or references.
- **INTRODUCTION** should describe the state of the art in the area of research and the objective of the work presented.
- **MATERIALS AND METHODS** should include full details of the experimental procedures and the statistical methods used.
- **RESULTS** should be presented in clear and precise terms, without data repeated in tables and figures. Color photographs will be accepted exceptionally, only when they provide critical information.
- **DISCUSSION** should be concise and kept to the topic and should be completed with conclusions.
- Acknowledgements can be included, if necessary.
- **REFERENCES** should be listed in alphabetical order of the authors. Papers by the same authors should be listed in chronological order. If they are published in the same year, they should be lettered in a sequence: 2002 a, 2002 b, etc. The abbreviated titles of periodicals according to "Word list of scientific periodicals" should be used in References. The titles not included in this list should be written in full, not abbreviated.

The following standard forms (based on ISO 690 and ISO 690-2) should be used:

Smith R.S., Luck G.F., Bums K.L. 1992. Growth of leaves. J. Amer. Soc. Hort. Sci. 122: 658–672.

Smith A.B., Luck G.F. 1988. Advances in science. PWN, Warszawa, 325 p.

Smith A.B. 1980. Growth of plants. In: Engel W. (Ed.), Encyclopaedia of science, vol. 2. PWN, Warszawa, pp. 82–94.

Nybohm H. 1990. DNA fingerprinting in plant breeding. Proc. Intern. DNA Fingerprinting Symposium. Bern, Switzerland, 1–3 May 1990, pp. 32–45.

Please, add the **DOI** number (if present).

Citations in the text should be by name of the author and year of publication, chronologically.

- **Manuscript format**

The manuscript should be typed using Times New Roman font 12.

Units should be expressed according to the SI system.

All Latin (scientific) names should be written in italics.

Quoted Russian and other papers written in Cyrillic alphabet should be transliterated according to the ISO standard.

The common names of active substances of plant protection chemicals, including growth regulators, approved by BSI, WSSA or ISO should be used (trade names in brackets). Otherwise, the full chemical name (IUPAC nomenclature) shall be provided. For each chemical the product's trade name and formulation used should be stated in "Materials and methods" chapter only. Doses of plant protection chemicals should be expressed throughout the paper in terms of active substances, not as volume or weight of commercial product.

- **Tables and figures**

Tables with titles should be prepared on separate pages and numbered successively as they occur in the text. Tables must fit in standard A4 page with 2.5 cm margins all around, positioned vertically, font 12.

The graphs shall be prepared using Excel or Statistica programs and saved in editable format. No bitmap files (TIFF, GIF, JPG etc.) with the graphs will be accepted.

The resolution of photographs should be at least 300 dpi and saved as JPG or TIFF files. The captions of the graphs and photographs should be listed on a separate page.
