

Program of workshop:

'Seed quality in genetic resources conservation of horticultural plants'

October 27th 2017, Skierniewice

9.00 – 10.00

Registration

10.00

Opening

Małgorzata Korbin, Director of Research Institute of Horticulture (InHort), Skierniewice

10.10

Physiological basis of seed germination, dormancy and longevity

Christophe Bailly, University Paris VI, France

10.40

Genetic and environmental basis of seed longevity

Manuela Nagel, IPK Gatersleben, Germany

11.10

Key factors affecting seed quality – from regeneration to storage

Andreas Boerner, IPK, Gatersleben, Germany

11.40

Coffee break

12.10

Gene bank procedures for seeds of deciduous shrubs and trees

Czesław Koziol, Kostrzyca Forest Gene Bank, Poland

12.40

Cryogenic seed bank of wild Polish flora species

Maciej Niemczyk

Botanic Garden of Polish Academy of Sciences, Powsin, Poland

13.10

Discussion

13.30

Lunch

14.30

Group Work

Groups for different topics concerning genebank standards for horticultural crops – participants can register for a groups.
Groups topics will be specified.

15:00

Feedback from group work

15:20

Plenary discussion, conclusions

15:50

Closing
